

Hello,

My name is James Sedillo, engineer at Los Alamos National Laboratory (LANL) and vendor coordinator for the 2010 Beam Instrumentation Workshop (BIW10). The Beam Instrumentation Workshop is a biennial event in which scientists, engineers, and technicians from laboratories all over the world come to share their ideas on the physics and engineering challenges of beam diagnostic and measurement techniques for charged particle accelerators.

I would like to extend an invitation to the representatives of your company to participate in this year's workshop, which is being hosted by LANL. BIW10 is an excellent opportunity for your company to display its products and services, as well as interact with many potential customers within the high-energy physics profession of particle accelerators.

With the Department of Energy's agreement, the date for this workshop has been established as May 2, 2010, through May 6, 2010, and held in Santa Fe, New Mexico.

If you are interested, please contact me by phone at (505) 665-3094 or by email at jsedillo@lanl.gov. I appreciate your consideration.

Sincerely,

James Sedillo
